

Pet Breed Data Appendix

Pandas (Group 5): Alice Vadney (leader), Max St. Clair, Sterling Gutterman  
DS 4002  
4/15/25

This appendix contains information on pet images with the goal of training a model to predict species and breed. The unit of observation is an image, organized by breed annotation.

Variables: description of variables included for each image.

- Breed name: description of type of dog or cat breed.
